July 2015

Partnership between KBA-MetalPrint and Vision Experts

Metal decorating leader KBA-MetalPrint becomes distributor for the print inspection system VE 4000+ METAL from Vision Experts

Vision Experts is already widely known on the international market as a manufacturer of inspection systems for monitoring of the decoration and finishing of packaging and other print products. Indeed, in the field of print inspection for metal decorating applications, Vision Experts has assumed a leading role in innovation over the past few years.

There are many users worldwide who are interested in a print inspection system which can be integrated into their metal decorating press. Such a system is capable of detecting not only printing flaws, but also colour deviations. It warns the operator immediately, helps to localise the source of arising problems, and facilitates timely intervention in the printing process. All quality defects are recorded in a report and affected sheets can be ejected immediately on the basis of various criteria. In case of a systematic problem, it is also possible to stop the feeder. The use of VE 4000+ METAL serves to reduce costs while at the same time improving the overall quality of the print products. Inspection systems from Vision Experts are already in successful use with many customers of KBA-MetalPrint and have earned a very good reputation through their exceptional reliability and user-friendliness.

Thomas Groß, sales administration director at KBA-MetalPrint: "Thanks to the cooperation with Vision Experts, and not least their excellent product, we are able to offer our customers further added value and an evident lead in quality monitoring for our high-performance metal decorating presses."

Paul Dirr, sales director at Vision Experts, adds: "We are delighted to be able to work together with such a renowned and future-oriented company as KBA-MetalPrint. They possess a broad, international customer base – also in countries in which we have not been present to date. That is a fantastic opportunity to generate further interest in our systems. Both KBA-MetalPrint and Vision Experts attach great importance to customer orientation and are well known for their innovative products. Our partnership with KBA-MetalPrint will enable both companies to strengthen their reputation on the market."
